**Join Us at Brooklyn
Museum for a Guided
Tour of *Sculpting the
Senses*.**

Making its North American debut at the Brooklyn Museum, this groundbreaking exhibition celebrates visionary fashion designer Iris van Herpen. Exploring themes from the depths of the ocean to the far reaches of the universe, the exhibition reveals how nature, anatomy, movement, light, and science inspire her innovative creations. Blending art, technology, and fashion, van Herpen transforms scientific discoveries into sculptural gowns and ethereal designs worn by icons including Beyoncé, Lady Gaga, Björk, Cate Blanchett, Miley Cyrus, and Ariana Grande.
